CONTENTS OF VOLUME 52

PART 1 (March 1996)

Assessing the fit of the logistic regression model to individual matched sets of case-control data
E. J. Bedrick and J. R. Hill 1

A semiparametric extension of the Mann–Whitney test for randomly truncated data
W. B. Bilker and M.-C. Wang 10

Multiple test procedures for dose finding . . . . . A. C. Tamhane, Y. Hochberg, and C. W. Dunnett 21

Sequential estimation of log (abundance) . . . . . A. Stewart-Oaten 38

Modeling of nonlinear growth curve on series of correlated count data measured at unequally spaced times: A full likelihood based approach . . . . . P. Lambert 50

Planned unbalanced designs for estimation of quantitative genetic parameters. I: Two-way matings
P.-S. Shen, P. L. Cornelius, and R. L. Anderson 56

The myth of continuity-corrected sample size formulae . . . . . I. Gordon and R. Watson 71

Exact confidence intervals for the common mean of several normal populations
S. M. Jordan and K. Krishnamoorthy 77

Some permutation tests for survival data . . . . . Y. Sun and M. Sherman 87

Pattern-mixture models for multivariate incomplete data with covariates . . . . . R. J. A. Little and Y. Wang 98

A Markov regression model for nutritive sucking data . . . . . P. Zhang and B. Medoff-Cooper 112

Simple Latin square sampling +1: A spatial design using quadrats . . . . . P. L. Munholland and J. J. Borkowski 125

Nonparametric survival estimation using prognostic longitudinal covariates . . . . . S. Murray and A. A. Tsiatis 137

Improved sequential probability ratio tests for negative binomial populations . . . . . P. M. Heffernan 152

The effect of variance function estimation on nonlinear calibration inference in immunoassay data
B. A. Belanger, M. Davidian, and D. M. Giltinan 158

Testing the homogeneity of kappa statistics . . . . . A. Donner, M. Eliasziw, and N. Klar 176

Confidence regions for evolutionary trajectories . . . . . C. E. McCulloch, M. D. Boudreau, and S. Via 184

Bayesian hypothesis testing of four-taxon topologies using molecular sequence data
J. S. Sinsheimer, J. A. Lake, and R. J. A. Little 193

A competing risks analysis of presenting AIDS diagnoses trends
R. E. Fusaro, P. Bacchetti, and N. P. Jewell 211

Estimation of Poisson intensity using partially observed concomitant variables . . . . . S. L. Rathbun 226

Bias in slope estimates for the linear errors in variables model by the variance ratio method . . . . . S. D. Edland 243

Matching using estimated propensity scores: Relating theory to practice . . . . . D. B. Rubin and N. Thomas 249

A mixed effects model for overdispersed count data in animal breeding . . . . . R. J. Tempelman and D. Gianola 265

Shorter Communications

A note on fitting a marginal model to mixed effects log-linear regression data via GEE . . . . . U. Grömping 280

Antihypertensive effect of drugs: Statistical distribution of the trough-to-peak ratio
V. X. Chi and N. P. Chau 286

A jackknife estimator of variance for Cox regression for correlated survival data
S. R. Lipsitz and M. Parzen 291

A nonparametric maximum likelihood estimator for the receiver operating characteristic curve area in the presence of verification bias . . . . . X. H. Zhow 299

A note on exact tests for variance components in unbalanced random and mixed linear models
R. Fayyad, F. A. Graybill, and R. K. Burdick 306

Exact tests for variance components . . . . . R. Christensen 309

A simplified procedure for comparing the stability of cropping systems . . . . . H.-P. Piepho 315

Inference on segmented polynomial models
M. Zhan, C. B. Dean, R. Routledge, R. Gallaugher, A. P. Farrell, and H. Thorarensen 321

Duration of ventilating tubes: A test for comparing two clustered samples of censored data
C. T. Le and B. R. Lindgren 328

On Bayesian estimation of group size . . . . . A. R. Solow and D. Palka 335

The Consultant's Forum

A weighted concordance correlation coefficient for repeated measurement designs
V. M. Chinchilli, J. K. Martel, S. Kumanyika, and T. Lloyd 341

Generalized estimating equations for ordinal data: A note on working correlation structures . . . . . T. Lumley 354

Reader Reaction:The analysis of categorical case-control data subject to nonignorable nonresponse
S. G. Baker 362

Correspondence 370

Book Reviews 373

Corrections 380

PART 2 (June 1996)

Mixed Poisson regression models with covariate dependent rates
P. Wang, M. L. Puterman, I. Cockburn, and N. Le 381

Quasilikelihood estimation in measurement error models with correlated replicates
N. Wang, R. J. Carroll, and K.-Y. Liang 401

An interval estimate for the intraclass correlation in beta-binomial sampling
K.-J. Lui, W. G. Cumberland, and L. Kuo 412

Linkage between quantitative trait loci and marker loci: Resolution power of three statistical approaches in single marker analysis . . . . . A. B. Korol, Y. I. Ronin, and V. M. Kirzhner 426

Coupled error spending functions for parallel bivariate sequential tests . . . . . R. J. Cook 442
Inference for lethal gene estimation with application in plants . . . . . J. K. Lee, E. V. Nordheim, and H. Kang 451
Simultaneous confidence intervals for pairwise multiple comparisons in a two-way unbalanced design
S. H. Cheung and W. S. Chan 463
A mixed effects model for multivariate ordinal response data including correlated discrete failure times with ordinal responses. . . . . T. R. Ten Have 473
Fitting a multiplicative incidence model to age-and time-specific prevalence data . . . . . I. C. Marschner 492
Efficiency of regression estimates for clustered data . . . . . L. A. Mancl and B. G. Leroux 500
A proportional hazards model for arbitrarily censored and truncated data . . . . . A. Alioum and D. Commenges 512
Effective family number following selection with restrictions . . . . . R.-P. Wei and D. Lindgren 525
Meta-analysis of published data using a linear mixed-effects model . . . . . D. O. Stram 536
Using robust scale estimates in detecting multiple outliers in linear regression
W. H. Swallow and F. Kianifard 545
Robust tests for treatment comparisons based on recurrent event responses
R. J. Cook, J. F. Lawless, and C. Nadeau 557
Goodness-of-fit in generalized nonlinear mixed-effects models . . . . . E. F. Vonesh, V. M. Chinchilli, and K. Pu 572
A flexible model for human circadian rhythms . . . . . Y. Wang and M. B. Brown 588
Designs for interference . . . . . O. David and R. A. Kempton 597
Tests for the analysis of variance of crossover designs with correlated errors
F. Bellavance, S. Tardif, and M. A. Stephens 607
Optimal designs for bivariate logistic regression. . . . . M. A. Heise and R. H. Myers 613
Estimating transition probabilities from aggregate samples augmented by haphazard recaptures
D. L. Hawkins, C. P. Han and J. Eisenfeld 625
Nonparametric MLE under two closed capture–recapture models with heterogeneity
J. L. Norris, III and K. H. Pollock 639
Latent variable models with fixed effects . . . . . M. D. Sammel and L. M. Ryan 650
Model selection in ring-recovery models using score tests . . . . . E. A. Catchpole and B. J. T. Morgan 664
Continual reassessment method: a likelihood approach . . . . . J. O'Quigley and L. Z. Shen 673
Estimation of parameters of the generalized geometric distribution using ranked set sampling
D. S. Bhoj and M. Ahsanullah 685
Shorter Communications
Measurement of interrater agreement with adjustment for covariates. . . . . W. Barlow 695
Utilization of capture–mark–recapture for the study of recruitment and population growth rate . . . . . R. Pradel 703
Size- and shape-related principal component analysis . . . . . J. F. C. L. Cadima and I. T. Jolliffe 710
On the unique equilibrium state of tetraploids under selection. . . . . M. K. Singh and R. A. Kumar 717
Some versatile tests based on the simultaneous use of weighted log-rank statistics . . . . . J. W. Lee 721
Nonparametric tests of tumor prevalence data . . . . . J. Sun and J. D. Kalbfleisch 726
Design considerations in crossover trials with a single interim analysis and serial patient entry
R. J. Cook and A. R. Willan 732
Analyzing bivariate repeated measures for discrete and continuous outcome variables . . . . . J. Rochon 740
The Consultant's Forum
The score test for independence in $R \times C$ contingency tables with missing data
S. R. Lipsitz and G. M. Fitzmaurice 751
Analysis of variety yield trials using two-dimensional separable ARIMA processes
M. O. Grondona, J. Crossa, P. N. Fox, and W. H. Pfeiffer 763
Presentation of ordinal regression analysis on the original scale. . . . . M. Hannah and P. Quigley 771
Book Reviews 776

PART 3 (September 1996)

AIDS, epidemics, and statistics . . . . . R. Brookmeyer 781
Random effects models in latent class analysis for evaluating accuracy of diagnostic tests
Y. Qu, M. Tan, and M. H. Kutner 797
Rank invariant tests for interval censored data under the grouped continuous model . . . . . M. P. Fay 811
Limiting the effects of single-member families in the estimation of the intraclass correlation. . . . . K. J. Keen 823
Convergence of covariance structures in additive Gaussian polygenic models. . . . . S. Mahdi and S. Lessard 833
A permutational step-up method of testing multiple outcomes . . . . . J. F. Troendle 846
A general methodology for the analysis of capture–recapture experiments in open populations
C. J. Schwarz and A. N. Arnason 860
A regression survival model for testing the proportional hazards hypothesis
C. Quantin, T. Moreau, B. Asselain, J. Maccario, and J. Lellouch 874
Permutation tests for least absolute deviation regression . . . . . B. S. Cade and J. D. Richards 886
Estimating equations for measures of association between repeated binary responses
S. R. Lipsitz and G. M. Fitzmaurice 903
Nonparametric inference in factorial designs with censored data . . . . . M. G. Akritas and M. P. LaValley 913
Power and sample size for matched case-control studies . . . . . A. Ejigou 925
An EM algorithm for nonlinear random effects models . . . . . S. Walker 934
Modeling conception as an aggregated Bernoulli outcome with latent variables via the EM algorithm
H. Zhou and C. R. Weinberg 945

Score tests for interclass correlation in familial data ..... S. R. Paul 955
Exact t and F tests for analyzing studies with multiple endpoints ..... J. Läuter 964
Testing for homogeneity of Hardy–Weinberg disequilibrium using data sampled from several populations
J. M. Olson and M. Foley 971
On approximating the moments of the equilibrium distribution of a stochastic logistic model
J. H. Matis and T. R. Kiffe 980
Optimal sample size for a series of pilot trials of new agents..... T.-J. Yao, C. B. Begg, and P. O. Livingston 992
Intention-to-treat analyses for incomplete repeated measures data ..... J. W. Hogan and N. M. Laird 1002
A note on exact analysis of several 2×2 tables..... K. F. Hirji 1018
Maximum likelihood estimation of allele frequencies in the eusocial Hymenoptera using offspring genotypes
G. J. Umphrey and J. N. Haddad 1026
Group sequential designs for monitoring survival probabilities
D. Y. Lin, L. Shen, Z. Ying, and N. E. Breslow 1033
Diagnostics and a statistical test of neutrality hypotheses using the dynamics of cytonuclear disequilibria
S. Datta and J. Arnold 1042
Shorter Communications
Bayesian models for limiting dilution assay and group test data ..... S. E. Chick 1055
An exact McNemar test for paired binary Markov chains..... W. Smith and A. R. Solow 1063
Parameter estimation from incomplete data in binomial regression when the missing data mechanism is non-ignorable..... J.G. Ibrahim and S. R. Lipsitz 1071
Analysis of time to death after transplantation when transplants are only given to patients in remission
D. O. Stram, H. Sather, and L. Wang 1079
Testing for autocorrelation and equality of covariance matrices ..... S. P. McKeown and W. D. Johnson 1087
Saddlepoint approximations of marginal densities and confidence intervals in the logistic regression measurement error model ..... R. Gatto 1096
The Consultant's Forum
Order-restricted tests for stratified comparisons of binomial proportions..... A. Agresti and B. A. Coull 1103
Quantitative analysis of a presence/absence microbiological assay: The hard surface carrier test of disinfectant efficacy..... M. A. Hamilton and T. A. DeVries 1112
Methods for analyzing multivariate binary data, with association between outcomes of interest
G. Molenberghs and L. L. Ritter 1121
Exact confidence intervals for proportions estimated by group testing..... G. Hepworth 1134
Changepoint statistics for assessing a treatment–covariate interaction ..... J. A. Koziol and S.-C. H. Wu 1147
Reader Reaction: Nonparametric analysis for doubly ordered two-way contingency tables
D. J. Best and J. C. W. Rayner 1153
Correspondence..... 1157
Book Reviews..... 1158
Corrections 1164

PART 4 (December 1996)

Regression analysis with missing covariate data using estimating equations
L. P. Zhao, S. Lipsitz, and D. Lew 1165
High-dimensional multivariate probit analysis ..... R. D. Bock and R. D. Gibbons 1183
Assessing reproducibility by the within-subject coefficient of variation with random effects models
H. Quan and W. J. Shih 1195
Resampling procedures to compare two survival distributions in the presence of right-censored data
G. Heller and E. S. Venkatraman 1204
A reexamination of the cell-lineage data of E. O. Powell
R. G. Staudte, J. Zhang, R. M. Huggins, and R. Cowan 1214
Mantel–Haenszel-type inference for cumulative odds ratios with a stratified ordinal response
I.-M. Liu and A. Agresti 1223
Diagnosing influential observations in quadratic discriminant analysis ..... W. K. Fung 1235
Versions of the sign test in the presence of ties..... C. W. Coakley and M. A. Heise 1242
A quasi-likelihood approach for ordered categorical data with overdispersion ..... Y.-G. Wang 1252
Using projection for testing goodness-of-fit in regression models for repeated measures
R. P. Qu and M. Palta 1259
Construction of confidence intervals for quantitative trait loci location in F_2 populations
C. Cierco and B. Mangin 1268
Studying school size effects in line transect sampling using the kernel method..... S. X. Chen 1283
A modified EM algorithm for estimation in generalized mixed models..... B. M. Steele 1295
Interim monitoring of longitudinal comparative studies with recurrent event responses
R. J. Cook and J. F. Lawless 1311
Intent-to-treat analysis for longitudinal studies with drop-outs ..... R. Little and L. Yau 1324
Practical Bayesian inference using mixtures of mixtures..... G. Cao and M. West 1334
On the use of nonparametric regression techniques for fitting parametric regression models..... M. G. Akritas 1341
Subset selection with additional order information ..... G. Pan 1363
Designs for phase II trials allowing for a trade-off between response and toxicity
M. R. Conaway and G. R. Petroni 1375
Confidence intervals from randomization tests ..... P. H. Garthwaite 1387
A generalized Dirichlet distribution accounting for singularities of the variables ..... P. Lewy 1394

Estimating tag-shedding rates for experiments with multiple tag types. . . . . N. J. Barrowman and R. A. Myers 1410
Multipoint linkage analysis via Metropolis jumping kernels . . . . . S. Lin 1417
Sequential estimation of linkage between PCR-generated markers and a target gene employing stepwise bulked analysis . . . . . Y. I. Ronin, A. B. Korol, T. Fahima, V. M. Kirzhner, and E. Nevo 1428
Tests of independence for bivariate survival data. . . . . J. H. Shih and T. A. Louis 1440
Explanatory analysis of randomized studies . . . . . D. Tritchler 1450
On catch–effort methods of estimating animal abundance . . . . . J. Bishir and R. A. Lancia 1457

Shorter communications
Rao's distance between normal populations that have common principal components . . . . . W. J. Krzanowski 1467
An estimator of species overlap using a modified beta-binomial model
W. Smith, A. R. Solow, and P. E. Preston 1472
Use of historical controls in time-adjusted trend tests for carcinogenicity . . . . . J. G. Ibrahim and L. M. Ryan 1478
Computing the Wald interval for a variance ration . . . . . Y. Lee and J. Seely 1486
Case influence on the intraclass correlation coefficient estimate. . . . . B. Giraudeau, A. Mallet, and C. Chastang 1492

The Consultant's Forum
Design of multiple binary outcome studies with intentionally missing data. . . . . P. Williams and L. Ryan 1498
Reader Reaction: A comment on interim analyses in crossover trials . . . . . A. P. Grieve and S. Senn 1515
Correspondence. 1521
Book Reviews 1525
Corrections 1530
